Summary

Management Engineer and Computer Science Engineer, with +6 years of experience in programming languages and software development, expertise in languages and stacks such as C++, .NET, Java, Python, R, Golang, Javascript, Typescript, NodeJs, NestJs, AWS, Shopify, Mercadolibre and Vtex. My experience has been based in the retail/e-commerce sector with my roles focused on process optimization, solutions design, and full-stack implementations with an emphasis on backend. I consider myself a person with a high level of leadership, assertive communication, detail oriented, with high negotiation, teamwork and conflict resolution skills; focused on achieving goals and objectives leveraged by technology solutions. I am passionate about continuous improvement and designing solutions to solve new challenges and enable the digital transformation of businesses. Fluent in Spanish(native), English(C1), German(B1) and French (B2).
